V-Ray® for SketchUp Key Features

- Multi-threaded ray-traced rendering engine, fully integrated with SketchUp
- Complete Global Illumination solution, including brute force, irradiance map, light cache and photon map
- Physically accurate lighting, including IES lights, spot lights, and rectangular area lights
- Robust anti-aliasing
- Unlimited rendering resolution
- Advanced color mapping controls with integrated linear workflow
- V-Ray frame buffer, including region rendering and color correction controls
- Distributed rendering
- Native SketchUp material support
- Material editor with true material previews
- Caustics and dispersion
- Ambient occlusion
- Ward, phong, and blinn shader types
- Procedural textures, including dirt, granite, marble, stucco, and wood
- Rendering channels for post-processing
- Support for SketchUp transparency and alpha transparency
- Glossy reflections and refractions
- HDR and EXR file support
- Physical Sun and Sky system
- Physical camera
- Depth-of-field and bokeh camera effects
- V-Ray two-sided material for easy creation of thin translucency effects
- Animation support
- Automatically save V-Ray materials with components

For SketchUp

TESTIMONIALS

“The addition of Ambient Occlusion in V-Ray for SketchUp adds a new level of realism for architectural visualizations, making the details and shadows in interiors “pop” and creating an instant convincing dirt effect to exterior surfaces.”

Jackson Barkess
Architectural Designer

“V-Ray has been the primary tool that has enabled me to develop Aura Studio, an entity of Desmone & Associates Architecture firm, and win a number of proposed architectural projects. V-Ray is essential to our studio’s workflow because it has the perfect blend of speed, quality and usability that 3D artists look for.”

Adam Warner
Architectural Designer
